

Accelerating transition to a Smart Enterprise

InfraBeat has carried out Cloud Sizing, Architecture Design and Infrastructure Readiness as per the best practices. Along with the initial setup, InfraBeat also managed the entire infrastructure, from an availability and reliability perspective.

The challenge

When Enpro decided to adopt SAP S/4HANA hosted on GCP, there were mainly 3 key challenges they had- • Migration to a new ERP Platform • Minimal Expertise in Data Centre Management or Infrastructure Management • Connectivity from multiple Office & Plant Locations

The solution

With a “Cloud First” approach, ENPRO adopted GCP, which offered a reliable, scalable and agile infrastructure for business-critical ERP Systems. Solution Deployed: • SAP S/4HANA on Google Cloud Compute Engine • HANA Backup using GCP Backint API • Stackdriver Monitoring • Scheduling of Non-Production Infrastructure during Non-Business Hours

The results

- End to End Managed ERP Solution with Application, Database and Infrastructure
- Zero Infrastructure Issues during Project Phase and till date after Go-Live
- Ability to create Sandbox VMs within minutes during Project Testing Phase
- Secure, Low Latency Connectivity from various locations and for employees working from Home.

“ Hosting SAP S4/HANA on the Google Cloud Platform has been a seamless experience, during implementation and after go-live as well. It has enabled us to offload our server management to experts and allowed us to focus on our core work. Hosting our SAP on GCP was a future-oriented decision, which will enable us to scale with flexibility and expand globally. ”

Mr. Anuj Karkare, Executive Director - Strategy, Enpro Industries Pvt. Ltd.

About ENPRO INDUSTRIES PVT. LTD.

Started by a technocrat couple in 1988, ENPRO today is a world leader in the design and manufacture of mechanical fluid systems and process equipment. Enpro exports over 80% of their products to countries around the globe and are suppliers to major Oil and Gas, Power, Chemical and Fertilizer companies.

Industry: Manufacturing & Industrial

Primary project location: India
