**Transforming Cannabis
Production Efficiency
with GROW with SAP**

Driving Operational Excellence in the Cannabis Industry through GROW with SAP

InfraBeat played a pivotal role in orchestrating the seamless implementation of GROW with SAP, revolutionizing operations for the cannabis industry leader.

Client

An industry-leading cannabis producer cultivating and processing organic cannabis for medical use.

\$68.8 M

Turnover

1,000+

Workforce

Cultivation and Processing Facilities

British Columbia, Alberta, Ontario, and Quebec

Customers

Products are sold in Canada, the United States, and Europe

Challenges

- Disparate IT applications across multiple locations led to inconsistent data.
- Lack of integration between applications hindered seamless operations and accurate reporting.
- Global expansion necessitated standardized business processes.

InfraBeat Solution

- Deployment of GROW with SAP
- Conducted comprehensive discovery and assessment workshops across 6 company codes.
- Addressed process complexities and customization failures.
- Orchestrated integration of diverse cloud platforms to ensure a cohesive user experience.
- Established end-to-end process standardization, reducing technical debt and optimizing business cases.

Business Benefits Delivered

- Accelerated generation of management reports through SAP's Fiori mobility platform.
- Streamlined operations via process automation, minimizing paperwork.
- Reduced dependency on technical resources (Basis and Development teams).
- Access to cutting-edge functionalities with each software release, ensuring up-to-date operations.

Key Achievements

Standardized COA

Simplified cross-company reporting with standardized Chart of Accounts.

Enhanced Output Forms

Developed Adobe-based output forms for improved communication and documentation.

Optimized SAP Practices

Leveraged SAP Best Practices with minimal customization for efficient utilization.

Seamless Integration

Leveraged standard APIs from the library for seamless integration with third-party applications.

Intercompany Stock Transfers

Successfully implemented intercompany stock transfers using the Intercompany Matching and Reconciliation (ICMR) feature.

Rapid Implementation

Successfully met implementation timeline of 4 months.
