

Case Study

Infrastructure Company:
**Transforming with SAP
RISE and Google Cloud**

Empowering Growth Through **SAP RISE** on **Google Cloud**

InfraBeat played a pivotal role in seamlessly transitioning an infrastructure company to SAP RISE hosted on Google Cloud Platform, ensuring a successful S/4HANA migration and enabling technological advancement.

Client

A leading construction company with a diverse portfolio and operations in multiple countries.

10,000

Acres of land constructed

1000+

Projects Completed

20+ Countries

Global Presence

10,000+

Employees

Challenges

- Legacy SAP system hampered performance.
- Extensive data center migration for SAP S/4HANA conversion:
 - Migration to SAP HANA.
 - 2TB+ data size.
 - Management of 20 applications.
 - 50+ server infrastructure.
 - Consolidation of 10 database platforms.
 - Sustaining 100+ integrations.
 - Impact on 8000+ custom objects.

InfraBeat Solution

- Comprehensive conversion, upgrade, and data center migration to SAP S/4HANA on RISE, addressing the extensive landscape complexities.
- State-of-the-art, SAP-certified infrastructure hosted on Google Cloud Platform.
- Cloud-based scalability and flexibility.
- Implementation of leading practice SLAs and streamlined processes.

Business Benefits Delivered

- **Technological Advancement:** Up-to-date SAP infrastructure enabling the adoption of new technologies.
- **Operational Efficiency:** Defined SLAs and efficient processes for smoother operations.
- **Innovation Focus:** Freed resources to focus on innovation.
- **Cloud Hosting Advantages:** Leveraging Google Cloud Platform's robust infrastructure for reliability.
- **Scalability:** Easily scale resources to meet changing business demands.
- **Cost Efficiency:** Cost optimization through cloud-based solutions.

Key Achievements

Downtime-Optimized Migration

Minimized disruption during SAP S/4HANA conversion.

Secure Connectivity

Established secure connectivity across all customer locations.

Change-Freeze Minimization

Achieved minimal change freeze through meticulous planning.

End-to-End Migration

From assessment to testing, a seamless project lifecycle.

Application Modernization

Replatformed Enterprise Portal (EP) applications on Fiori and SuccessFactors.

SIEM Integration

Successfully integrated the SIEM platform for enhanced security.

Google Cloud Advantage

Utilized the power of Google Cloud Platform for SAP RISE hosting while managing a complex landscape.
